Live And Learn

Blacklite District

From the basement to the billboard
From the bottom we build to dream
There's just so much to work for
And so much we've done and all that we've seen

There's no problem to solve, your so egotistical
That I'm forced to evolve

Live and learn
What's your money take us down down down
Never thought it would turn your head around
That was then this is now now now
I guess we live and learn

So I work on the right now
And the focus is still the same
But the harder we weight the more I
Think back to when we started this game

There's not problem to solve, your to egotistical
That I'm forced to evolve

Live and learn
What's you money take us down down down
Never thought it would turn your head around
That was then this is now now now
I guess we live and learn

Live and learn
Live and learn

Live and learn
What's your money take us down down down
Never thought it would turn your head around
That was then this is now now now
I guess we live and learn

Live!
Live and learn!
