

Our Time

Blacklite District

Every since I was a kid, I always had a dream
The fire inside has always been there
The right kids together made the team
Killing every bead in every round to spare
The time came to be set free
To be real and finally see
The music is what keeps me sane
Even when I'm in so much pain

You can't tell me how it's done
'Cause you're the one that had the doubt
We're always working a ton
That's how we build our clout
Our time is now
To beat ourselves and scream out loud
The dream we're living stays right here

It's our time

Now that I'm older, I broke the code
And passed another bump in the road
It feels like things get harder and harder
But in the end it's what keeps me going
Ever since we came this far
We know now who we are
Took everything we've all been through
It's all really thanks to you

You can't tell me how it's done
'Cause you're the one that had the doubt
We're always working a ton
That's how we build our clout
Our time is now
To beat ourselves and scream out loud
The dream we're living stays right here

It's our time

It's our time
It's our time
It's our time
It's our time

You can't tell me how it's done
'Cause you're the one that had the doubt
We're always working a ton
That's how we build our clout
Our time is now
To beat ourselves and scream out loud
The dream we're living stays right here

It's our time

It's our time
It's our time
It's our time
It's our time
