

Try Again

Blacklite District

Everything gotta be tough
Always react like it ain't from love
Always believing that you keep on seeing
That side of me, I know you had enough
Even when we were just friends
I knew that we had it special back then
I knew from the start that you stole my heart
I knew there was no way this was pretend
Right through these ups and downs
You know we're better now Never say never now Right through the
se ups and downs
You know we're better now Never say never now

I know the feeling of being so lonely
I try to confide in you but I keep it low-key
Getting rid of all these feelings in my head
Deleting everything you ever said
Better off just being left on read
Try again, try again
All of the messages I never sent
Hoping for time that I know I won't get
