

# Still

Bladée

To kill and feel no remorse  
To brutally apply force  
To take away what is yours  
And leave your body a corpse  
Just take away everything  
To watch the curtains dropping  
Into the nothing within  
To make the jump without wings  
To take the leap to nothing  
Rid my original sin  
To feel the rain on your skin  
All while the pendulum swings  
To hear the words between words  
To have the damage reversed  
To finally end the search  
And put an end to the curse  
To give a life for a life  
To take a walk in the light  
To have the will to decide  
And stand forever in time  
Silver Christ in the clouds  
Raining down  
Heavy rain

We're on rooftops  
Helicopters  
Red propellers  
Thunder weather  
Tainted love  
Tinted windows  
Velvet setting  
Do you want to fly tonight?  
Do you want to fly tonight?  
Sense it in the air tonight  
Smell in the air tonight

Put a seed in the dirt  
Let the tree hit the dirt  
Powers adjourned  
I will not let it thru  
Let the seeds hit the dirt  
Let the trees clench the earth  
I got the power to control  
Hear you slow thru the boat  
Let the tree hit the dirt

Makeup on and your hair on right  
Cleanse my body in sea salt  
To try to keep calm  
Free of charge you showed your colors like a peacock  
20 different key cards  
Hotel deep hearts  
Hope you kept your heart when it's all said and done  
Better run  
Did it for yourself  
That when you don't become  
Just another one

I hope you kept your heart when it's all said and done  
Better run  
Did it for yourself that's when you don't become just another one

We're on rooftops  
Helicopters  
Red propellers  
Thunder weather  
Tainted love  
Tinted windows  
Velvet setting  
Do you want to fly tonight?  
Do you want to fly tonight?  
Is it in the air tonight  
Smell in the air tonight
