

TERRIBLE EXCELLENCE

Bladee

Terrible excellence, got the service in my section
Divine intervention, waiting for my resurrection
Stood in this position, standing tall in this position
Evil star in the sky, it glist-, glist-, glist-

This some boring shit, make it hit
I gotta- I gotta carry out the mission, and do the killin'
I wanna kill everything and be nothing (Profound sadness)
I wanna kill everything just like Chucky
The boys lucky, the shards on me shine lucky
I'm out hunting, the knife, need to find something
I'm blood-hungry, want blood on me, blood money
But don't worry, I'm clean but my clothes dirty
I haven't slept for a week, I can't sleep
I'm having anxiety, I can't breathe
Bad feelings, I'm hooked on the bad feelings
I miss dreaming, I'm late for a missed meeting
I can't sleep, I'm staring at the gray ceiling
I'm dream weaving, I smile but I'm still grieving
I like eating the night, I am mistreating
The cycle is repeating

Pretty violence in the silence, it's a dark story
Living legends in the flesh, it's all pain and glory
I don't even put the pressure, yeah, they do it for me
Enjoy the moments from the nightmares, another high score (Yeah)
With the boring blood tourin', through the pressure we are foreign
Not an angel without horns, there's no roses without thorns
Bladee said we do this shit like we been here before (We do)
I died for mine, I'll bleed for yours

Terrible excellence, got the service in my section
Divine intervention, waiting for my resurrection
Stood in this position, standing tall in this position
Evil star in the sky, it glisten (Glisten, glisten, glisten)

Listen when I'm spitting, it's Paramount to picture (Listen)
Skip the intermission, close the curtains, keep the distance
Brilliant grace, we winnin', creepin' late, don't raise suspicion (Uh
)
Rainbow VVS crystal (Profound sadness)

It feels too bad, I close my eyes and we go one for one
Put my heart in every word you hear, the pain come out
Serpents in the section make you wanna run
I don't wanna write another sad song but there's so much to come
(C-C-C-Cold Visions)

(Cold Visions)
(Forever)
