

# Thee 9 Is Up

Bladee

Do you still fancy me?  
Answer me  
What will you do if I find someone else?  
You're lying  
(Whatever)

Told bro, "Let's rock"  
We gon' climb up and get chilly at the top  
The bliss don't stop  
I'm not Christian but I'm busting down the cross (Bust down)  
The shield gon' lock  
We put gates up and we double up on guards  
The 9 is up  
Work the wizard ways, I'm punching in the clock (Pew)

Greatness for us  
If you believe in luck  
Trust the sacred  
Oh, just a touch, it's not enough  
A place beyond the lust and temptations of love  
Complete annihilation of us  
Walk in light, see with another eye  
SG, we fortified  
I've been down bad trying to get back up  
Had to make it worse, even more so  
So, when I'm at my lowest, there's no other way  
I'd only go up, I hope it's so  
Fear of death and stress causes stress and fear of death  
I can't lie, I must confess  
Fear of death and stress causes stress and fear of death  
I'm tryna see it as a test  
I'm praying to God, please god may you bless me (Please God)  
Still the same me but, baby, lately I've been messy  
I must forgive myself before you can even forgive me  
The shell is pretty, the Devil's busy  
Oh, looks desperately for a sign, it's trials and tribulation time  
The brave attempt fails and falls flat, he tries to take everything back  
He's sure that something will go wrong, and that makes everything go wrong  
But still the hope it's strong (The road is long you must go on)

(Your love, your love, your love)  
I'm falling twice every time, I just take a look in your eyes  
(Your love, your love, your love)  
In your arms, I'm a child, in your arms  
(Your love, your love, your love)  
I'm falling twice every time, I just take a look in your eyes  
(Your love, your love, your love)  
Takes me up, lifts me up

Told bro, "Let's rock"  
We gon' climb up and get chilly at the top, hahaha  
The 9 is up  
Work the wizard ways, I'm punching in the clock (Pew)  
The shield got locks  
We put gates up and we double up on guards
