

# Till We Collide

Blanche

We should go south, you should dress up  
It's that place we're heading  
Rest our souls  
This is special, special  
They lay together, make love for pleasure  
They can stay hours watching each other's eyes  
Making each other rise

Think I can see them coming  
I wonder what they're singing  
What makes them feel like killing  
What makes them feel like living

Even with a thousand souls around us  
Boy it's only you and I  
All this trapped emotion, they surround us  
Till the moment we collide  
Till we collide  
Everybody wanna watch our love  
They all stand up  
Ain't nobody can touch our love  
They all stand up  
Everybody wanna watch our love  
They all stand up  
Ain't nobody can touch our love  
They all stand up

[?] bitter

We can feel passion, and passion is lethal  
I tell you it's lethal  
You think you own it but sooner or later  
We find ourselves making each other die  
Telling each other lies

What makes them feel like killing  
What makes them feel like living

Even with a thousand souls around us  
Boy it's only you and I  
All this trapped emotion, they surround us  
Til the moment we collide  
Til we collide  
Everybody wanna watch our love  
They all stand up  
Ain't nobody can touch our love  
They all stand up  
Everybody wanna watch our love  
They all stand up  
Ain't nobody can touch our love  
They all stand up

Even with a thousand souls around us  
Boy it's only you and I  
All this trapped emotion, they surround us  
Til the moment we collide

Even with a thousand souls around us  
Boy it's only you and I  
All this trapped emotion, they surround us  
Til the moment we collide  
Til we collide  
Everybody wanna watch our love  
They all stand up  
Ain't nobody can touch our love  
They all stand up  
Everybody wanna watch our love  
They all stand up  
Ain't nobody can touch our love  
They all stand up
