

## Don't Let These Days

Blancmange

If you feel here comes a bad day  
And you're pushed  
And you can't have your say  
Isn't it better that you cancel this day  
By staying in bed and hiding away

Don't let these days get in your way  
Don't let these days get in your way

When you feel nothing is right  
And you're told it's not worth the fight  
Aren't you the one that's got the right  
Don't change that hat or hide out of sight

Don't let these days get in your way  
Don't let these days get in your way

When your belly's scraping the ground  
Don't you know you're not going down  
In your woes you feel you could drown  
Don't you know you're not going down  
There's a storm with no land in sight  
Don't you know you're not going down  
Reach out 'cause here comes the light  
Didn't I say you weren't going down

There's another one coming along  
Hold on it won't be too long  
The clouds will lift  
And your heaven will shine  
The band is playing  
In your kingdom divine

Don't let these days get in your way  
Don't let these days get in your way  
Don't let these days come what may  
Don't let these days get in your way
