When

Blancmange

You're sitting on the edge of an unmade bed
Wondering where your mind has wandered off to

When is anything about what it's about
For example when you and I scream and shout
What is it about?

Outside you see the world still turning
When when are you climbing back on board?

When is anything about what it's about
For example when you and I scream and shout
What is it about?

When is anything about what it's about
For example when you and I scream and shout
What is it about?
