

The Long Way

Blanco

(Kxlla K)

Uh

Check

Yup

Uh

Next year I'ma have way more decimals

My income residual

Dressed up or dressed down, we never do the minimal

Subtle but it's custom, the stones look invisible

Silent when we lift off, it's foreign but electrical

Push so many buttons, made my right hand illegible

Left hand was magic, I could click and make him vegetable

Skip the Twitter fingers, now it's pressure if I mention you

They did that boy foul, but the situation technical

Can't die for nyash, but if I'm hungry, need a leg or two

My legacy ahead of me, my lane switch a better view

My bitch lookin' edible, my problems numerical

We laugh offa' them, hahaha, so hysterical

I remember being broke as a joke with a pocket full of hope and a prayer for
a miracle

It get very, very scary with no shit to lose, I would do the most for the mi
nimal

Ha, for real

Mama told me that this life for real

Now mi can't believe that my life for real

I remember when mi rob, haffi steal

The long way, the long way, the long way

We come way too far and took the long way

The long way, the long way

We come way too far and took the long way

In the rain like I ain't check the weather

Beat it like a cypher but it's a capella

Pathogenic pagans, call them salmonellas

Nelly with a cut, I call it a dilemma

Hook 'em like it's cuttlefish

Trenches with the puddles in

Often all the time, I guess the people got me huddlin'

I was doin' all that extra time, I got them muddles in

Bro had a star, on that occasion, got the shuttles in

Diamonds on my chain, guess I'm a shiny slave

Monkey, but I barred him on a verse, let me find a frame

Rap about escape, but I'ma die in vain

Married to the game, but I'm lookin', call me Mike and Dave

Sod is on on his last lap

Spittin', but he can't rap

Said I run the block, I'm steady pacin' 'til that car crash

Quarter on my knee, I fled the scene, I watched that car dash

Smart with a whip, I hit the brake and then the fast gas

I don't do the most for the money, sold my soul for the money, but I lose it
all and say a prayer

Hidden with the smokes to the money, disappear into the smoke and then I pee
r again, it's crystal clear

The long way, the long way
We come way too far and took the long way
The long way, the long way
We come way too far and took the long way

Ha, for real
Mama told me that this life for real
Now mi can't believe that my life for real
I remember when mi rob, haffi steal

The long way, the long way, the long way
We come way too far and took the long way
The long way, the long way
We come way too far and took the long way
