

# Wish We Did Together

Blanks

You've been away for while now  
We've only spoken on the phone  
I only see you on Facetime  
Oh, I wish you would come home

And it drives me crazy, don't know what to do  
When I see your face and I can talk to you  
I wanna cuddle you, but I'm staring at a screen

And it makes me think, of the nights we spent  
And your long soft hair, your familiar scent  
Oh and everything I do right now  
I wish we did together  
I wish we did together

We both live life different  
You like adventure, I like you  
I hope we'll keep calling each other  
I wanna hear everything you do

But it drives me crazy, don't know what to do  
When I see your face and I can talk to you  
I wanna cuddle you, but I'm staring at a screen

And it makes me think, of the nights we spent  
And your long soft hair, your familiar scent  
Oh and everything I do right now  
I wish we did together  
I wish we did together

Yeah  
When I'm still back home and you're out there  
I kinda get the feeling that you're just not fair  
You got this stuff going on, and there's no time left  
For you to call with me: "cause u gotta get dressed"  
And I knew when I saw those pictures with him  
Someone else was getting closer on your skin  
And now I'm waiting for your call, telling me that we're done  
Thought you were in it for the long run, damn

But it drives me crazy, don't know what to do  
When I see your face and I can talk to you  
I wanna cuddle you, but I'm staring at a screen

And it makes me think, of the nights we spent  
And your long soft hair, your familiar scent  
Oh and everything I do right now  
I wish we did together  
I wish we did together

I wish we did together
