

A Distant Light

Blaqk Audio

We would play the night and upset the sun
And we'd feel all right 'til the final act was done
The act was done
So we left the house and we left the town
Like the snow that fell, the frigid walls came down
The walls came down

Would you take me then leave me down here?
Where it's perfectly freezing, I fear
We pave the road with gold

Here between the snowflakes falling, a distant light
Here between, it dies in your eyes
I found it, found the night

On a distant road, somewhere far behind
Where we hid the light that was never, never mine
We felt all right
So we went again and it went nowhere
You had hidden spells falling from your hair
Your short, black hair
And now we're

Here between the snowflakes falling, a distant light
Here between, it dies in your eyes
I found it, found the night
I died in your eyes
I died in your eyes

Here between the snowflakes falling
Here between the snowflakes falling
I found you, I found you

Here between the snowflakes falling, a distant light
Here between, it dies in your eyes
I found you
Here between the snowflakes falling, a distant light
Here between, it dies in your eyes
I found it, found the night
Here, between the snowflakes falling
Here between, it dies in our eyes
I found it, found the night
