

Bird Sister

Blaqk Audio

They're taking your dolls away
After you've broken every one
And all of the hair you saved
You'll tie into knots 'til they're undone
We all want some

Every god that I've found
Every god makes the same strange sound
Every god that I've found
Every god makes her way back now

Making the same strange sound

They're taking your men away
After you've melted every one
And all of the wax you saved
Mold into we red daughters and sons
Who all want blood

Every god that I've found
Every god makes the same strange sound
Every god that I've found
Every god makes her way back down

Can you hear it, can you hear it now?
I hear the same strange sound
Can you hear it? I can hear it now
I hear the same strange sound

Every god that I've found
Every god makes the same strange sound
Every god that I've found
Every god makes her way back down

Makes her way back down
Making the same strange sound
Makes her way back down
Making the same strange sound
