

Ghost in The Bottle

Blaze Bayley

A ghost in the battle
The mind storm has created the path
The secret of my future is hidden here in this day
Uncertain times ahead
Don't let them into your head
We need our mental strength
To face every one of them

Wish it, dream it, be it
We will find a way
Think it, see it, do it
We will find a way
We can live our dream
The time to start is now

Those fortune tellers reliably predicting doom
Convincing everyone it's hopeless, that's just a lie
Lines on your hand don't show who you are
What you can do Accept that life is hard
But good times could be on the cards

Wish it, dream it, be it
We will find a way
Think it, see it, do it
We will find a way
We can live our dream
The time to start is now

However long we have together we have to try
Try to make the best out of each day we are alive
Sometimes you feel it too
Overwhelmed and just confused
Hold on tight on your grip
We can make it through all this

Wish it, dream it, be it
We will find a way
Think it, see it, do it
We will find a way
We can live our dream
The time to start is now
We can live our dream
