

Pull Yourself Up

Blaze Bayley

Scars on my face
Scars on my knee
That remind me fate is their dream for us
Freedom is here
But like morning mist
Cast over you
Never held in your hand

When you think it's all or nothing
You abandon everything
In your life that can distract you from the laser focus you require

Abandoning yourself
Destroying yourself
Rejecting yourself
Reinventing yourself
Stretching out your hand
What can you now grasp
He said I could not walk
Come and walk with me
Pull yourself up
Come and walk with me

You are not who they thought you should be

When your heart burns
With self-doubt and fear
There are no words that will then comfort you
They bend your will
Perception of time
To convince you that life is preordained

When you think it's all or nothing
You abandon everything
In your life that can distract you from the laser focus you require

Stop doubting yourself
Questioning yourself
Stop hating yourself
To believe in yourself
Control my own thoughts
Control my own mind
They said I could not sing
Come and sing with me
Pull yourself up
Come and sing with me
