

For Anything Less

Blaze Foley

Last night you went away to be alone
And I trembled but I didn't shake too long
I know so many arms that are waiting just to hold you
But no one could want to hold you more than me

If I could win your love again someday
You know I would, I'd try my best
But I've looked around and I don't think that I can settle
For anything less, for anything less

I was stranded down in New Orleans
I was wandering down the streets alone
You know I wish it could've been just a bad dream
Cause I'm about to chew my fingers to the bone

Take me back the way I am cause you can't change me
I can't even change myself I know I've tried
And I've looked around and I don't think that I can settle
For anything less, for anything less, for anything less
