

# Race

Bleach

You've not seen the white smoke for years  
It seems to me you've stripped out  
Stripped out all your gears  
You know it will whip you a bit

Don't know if you can handle it  
But you can taste it, you taste the thrill  
Come on, come on, just one more mile  
You can make it if you will

I want to race, I wish you'd race  
I want to race you there  
Step on out and step on in  
To a race that never ends

Drop it out, you know it drags you down  
Rather turn your head to see a blurry crown  
But then you've been here before  
It's sounding better, better more and more

I want to race, I wish you'd race  
I want to race you there  
Step on out and step on in  
To a race that never ends

I want to race, I wish you'd race  
I want to race you there  
Step on out and step on in  
To a race that never ends

This thing, the call  
Decision based on knowing  
You've joined the race  
And now it's got you goin'

Bloodstream is pumping  
One hundred miles an hour  
You're set to go  
You know it's now or not at all

I want to race, I wish you'd race  
I want to race you there  
Step on out and step on in  
To a race that never ends

I want to race, I wish you'd race  
I want to race you there  
Step on out and step on in  
To a race that never ends

Let's get it started
