

Immortal Desire

Bleed from Within

What have I become?
I see a change in me
One that I can not deny
The price of failure is high

No vote of confidence, out of sight
Don't let it define us, we're still alive

Now I'm relentless
Executed in a state of unrest
I welcome destiny
Death is not the enemy

Immortal desire, show me the way
The seed that creates, the first that life erased
Immortal desire, at the gates where we await
I'd give life to save you

A dark presence haunts me, wears me down
I'm barely existing
Imprisoned
Now I'm set free, no longer desolate, no longer crawling
And I will live long enough
To see myself become the enemy

Immortal desire, show me the way
The seed that creates, the first that life erased
Immortal desire, at the gates where we await
I'd give life to save you

Take me back, for the devil's sake
Don't fear hell, we can only wait
For the grave to come calling
Death is not the end of me

I won't fear hell, it's a part of me
Engraved in the fabric of my being
I have lived through worse
No, death is not the end

Immortal desire, show me the way
The seed that creates, the first that life erased
Immortal desire, at the gates where we await
I'd give life to save you
I'd take life to save you
