

## Night Crossing

### Bleed from Within

I've crossed the night to find my way  
I came across this night in a distant future

To the gods beneath me and the devil above  
These figures of worship are straight for the furnace  
The end of ignorance for some  
Now there's a resurgence  
In my footsteps they follow but they don't know

I've crossed the line from good to bad  
So many times, I can't go back  
Couldn't reach the end because I failed to start  
I came across this night in a distant future

Blinding spears of light emerge  
From blackened skies that never seem to shift  
An end to the age of the innocent  
Reset, take note, our suffering ends tonight

I've crossed the line from good to bad  
So many times, I can't go back  
Couldn't reach the end because I failed to start  
I came across this night in a distant future

Our suffering ends tonight

We're trapped in a web of hatred  
All hope is lost  
I see reflections of a fallen god  
To find that faith was written in blood

Now hate is all I've got  
I cross the night

I've crossed the night to find my way  
The gods beneath me and the devil above
