

(Breathe in and scream these words as you shiver  
Rise up we need you now)

The rivers fill with blood  
We watch them drowning in the flood  
A land of freedom was once so clear to us  
There is no turning back, no shelter for the weak  
The pain that's been endured, can never be undone

This hell is all we know  
Never above, always below  
No future, no purpose, no hope  
No reason, no culture to show

Breathe in and scream these words as you shiver  
Rise up we need you now  
Our days are numbered now and forever  
Rise up we need you now

This has gone too far  
We fight fear with ignorance  
One mans hatred can spark these absent minds  
There is no turning back, no hope to set us free  
The hate that's born in us, will never be in me

This hell is all we know  
Never above, always below  
No future, no purpose, no hope  
No reason, no culture to show

Breathe in and scream these words as you shiver  
Rise up we need you now  
Our days are numbered now and forever  
Rise up we need you now

We submit ourselves to this madness

Burn all the evidence  
Exposing a world unknown  
Burn down our only hope  
We must unite to save ourselves  
From what we could become

Breathe in and scream these words as you shiver  
Rise up we need you now  
Breathe in and scream these words  
Rise up we need you now  
Our days are numbered  
Rise up we need you now more than ever  
We need you now more than ever
