

## State Decay

## Bleed from Within

Sail on your mistakes  
This world has yet to make a soldier of me  
I'm losing faith, I'm losing pride  
I'm filled with vengeance, I've chosen my side

It's not enough to be a casualty  
I'll never bow to this insanity  
Screaming set me free  
Dig our heels into the face of supposed democracy

Behold  
The absent the king has shown his hand to us  
Arise

We fell into the waves that carried this tragedy  
Somewhere along the way the skies turned grey  
Resist and stand united  
Through grief and dismay  
This kingdom left divided  
Witness the state decay

Bring them to trail to hang in the square  
A constant reminder of the hatred we share

It's not enough to send the help they need  
They'll never bow to this insanity  
Screaming to set them free  
Dig your heels into the face of supposed democracy

Behold  
The absent the king has shown his hand to us  
Arise

We fell into the waves that carried this tragedy  
Somewhere along the way the skies turned grey  
Resist and stand united  
Through grief and dismay  
This kingdom left divided  
Witness the state decay

Light the sculpture up, we paid in pain  
No prison cell can hold us, in pain we gain  
Light the sculpture up in flames  
Hammers fall to break these chains  
The state decays  
For it's nothing without us

And as we lay the fallen to rest in the ground  
Their families remember that peace can not be found  
With pain, we paid

Witness the state decay
