

# I Am Resistance

Bleeding Through

Every warning again  
With the sun that never sets  
Look at the mirror to find the solution  
Face is full of cracks

Fate, a four-letter word, for what I will stand  
We all think we know the solution  
Where is your love and devotion?

I am resistance  
Standing still with no motion  
Where is your love and devotion?  
I am resistance

What now becomes of me?  
I'm already cold. Already grey  
Questioning every part of me  
Push through the darkness, start to believe

Every warning again  
With the night that never sleeps  
Look at the mirror to find resolution  
Reflection begins to fade

Fate, a four-letter word, for what I will stand  
We all think we know the solution  
Where is your love and devotion?

I am resistance  
Standing still with no motion  
Where is your love and devotion?  
I am resistance

What now becomes of me?  
I'm already cold. Already grey  
Questioning every part of me  
Push through the darkness, start to believe

Push through the darkness  
Now start to believe  
Push through the dark times and start to believe

What now becomes of me?  
I'm already cold. Already grey  
Questioning every part of me  
Push through the darkness, start to believe

(Start to believe)

Start to believe
