

## Lost In Isolation

### Bleeding Through

It's all resurfacing, the wounds will never heal  
Must I cheat this life, bleeding out just to fucking feel?  
Just to fucking fail?

I'm staring down faceless death, scars that spell my name  
Cold embrace your deadly grasp  
See the light drain from my eyes, you've taken everything away  
from me  
You've taken my final breath

See what you love fall through the cracks  
See what I love fall through the cracks  
Leaving me somewhere in your past  
Please leave me, just leave me in the past

It's all resurfacing, the wounds will never heal  
Must I cheat this life, bleeding out just to fucking feel?

Full of lies, infected soul, blood that screams my name  
Cold embrace your deadly grasp  
Hear the sounds of creeping death, you've taken everything away  
from me  
You've taken my final breath

See what you love fall through the cracks  
See what I love fall through the cracks  
Leaving me somewhere in your past  
Please leave me, just leave me somewhere in the past

This self hatred is the end of days  
I know that life is pain, don't ever give up on me  
Don't you ever give up on me

This self hatred is the end of days  
I know that life is pain, don't ever give up on me

See what you love fall through the cracks  
See what you love fall through the cracks  
Leaving me somewhere in your past  
Leaving me somewhere in our past
