It's been three fucking days since sleep has taken me away
I found the remedy to erase you from my head
I can't find a pulse to feel this
I'll never feel again
So say your last goodbyes and I'm taking back my sins
I'll take back the heart I should have never let, never let you in
So say your last goodbyes, today I'm not coming back
I won't crawl back again
I never loved you
I never cared
I never loved you
You won't fuck the life from me again

You won't fuck the life from me again

Now your hands are filthy with narcissistic identities

A slave another junkie, you're haunting the streets

You're looking to feed

But I won't be your carcass

You cant add me to your pile of dead bodies

I'm driving the nails through your hands

So you can't fuck the life out of me

You won't fuck the life out of me

I never loved You

You can't fuck the life out of me

You won't fuck the life out of me
