

Last For Now

Blessing Offor

Last for now

Oh, the ground was rocky from the start
But we didn't care 'cause we had the heart
And all our friends was up against us
But we wasn't even scared
'Cause we found the spark

But sparks turn to flames
And we get too close
If it gets too hot, can we breathe through the smoke, oh?
Don't know, I hope so

We're only gonna last for now
And maybe that's for the better
We always seem to crash somehow
Even in perfect weather
We're good at having fun
But we don't have the fundamentals down
We're only gonna last for now
But for now, we're together
But for now, we're together

So we fuss and we fight
And we love and we cry
Baby, I'll take the lows
You take the highs
However it goes, they can't say we didn't try

Is love supposed to be this hard?
I never figured out this part
I would wish you away
But then I wouldn't know where you are

But sparks turn to flames
And we get too close
If it gets too hot, can we breathe through the smoke, oh?
Don't know, I hope so

We're only gonna last for now
And maybe that's for the better
We always seem to crash somehow
Even in perfect weather
We're good at having fun
But we don't have the fundamentals down
We're only gonna last for now
But for now, we're together
But for now, we're together
Ooh, for now, we're together
For now, we're together

Is love supposed to be this hard?
I never figured out this part
I would wish you away
But I wouldn't know where you are

Is love supposed to be this hard?

I don't know nothing 'bout this part
I would wish you away
But I wouldn't know where you are

Is love supposed to be this hard?
I never figured out this part

Is love supposed to be this hard?
I never figured out this part
