

Roots

Blessing Offor

No, no, don't make it easy
I want you to put me to the test
Love is most powerful in action
Love is most beautiful at best
I'm not gonna stand with you for one night
And leave you lonely in the morning
I'm not gonna tell you everything is alright
And leave you broken when I'm gone
I just wanna put my roots down next to you now
I just wanna put my roots down next to you now
Grow together, grow together
Grow together, put our roots down
And grow together, grow together
Grow together, put our roots down
No, no, don't try to change for me
I'll take you just the way you are (just the way you are)
Please, please, please, be easy with me
I've got miles on my feet, miles on my heart
But I've got many more miles in me left
Plenty more miles in me left
I've got many more miles in me left
Plenty more miles in me left
I just wanna put my roots down next to you now
I just wanna put my roots down next to you now
Grow together, grow together
Grow together, put our roots down
And grow together, grow together
Grow together, put our roots down, yeah

I just wanna put my roots down next to you now
I just wanna put my roots down next to you now
Grow together, grow together
Grow together, put our roots down
And grow together, grow together
Grow together, put our roots down, yeah
