

This Ends With Us

Blessthefall

When our voices go silent
Only pain will define us

Is this the end
Or just a sign of the symptoms
I'm seeing red as I'm fighting to resist them
It's been decided
No matter how hard I tried to fight it
One thing is certain
We all end up the same
We all end the same

Don't come too close
One slip and your clock starts running
Just so you know I never saw this coming
My body's cold about to lose control
Save yourself

Is this the end
A sickness rotting inside me
Decomposing, a plague unrelenting
Searching for a way to survive
Holding on to a dying light
Screaming out to a bloodshot sky
We all end up the same
We all end the same

Don't come too close
One slip and your clock starts running
Just so you know I never saw this coming
My body's cold about to lose control
Save yourself and find somewhere
You can run to
Scream into a bloodshot sky
They will never take you alive

When our voices go silent
Only pain will define us

When our voices go silent
Only pain will define us
