# Y.S.A.B.

**Blessthefall**

Go

You play with fire
Like you're never gonna burn
I tried to warn you
Here's another lesson learned

We're torching everything
Can't put me out of my misery
The pain brings out the best in me

You're still a bitch

You keep forgetting this is where we end
You keep forgetting

I'm taking it back
The spark you stole from my light
And I don't want to wait for stars to realign
I can't keep wasting all my time
Heavens just around the corner
Meet at the gates
It's a feeling I hold on to
When you want to let it slip away
Let it all go

Tear apart your broken wings
There's nowhere left to run
Now I got you on your knees
Tear it at the seams

You keep forgetting this is where we end
You keep forgetting

I'm taking it back
The spark you stole from my light
And I don't want to wait for stars to realign
I can't keep wasting all my time
Heavens just around the corner
Meet at the gates
It's a feeling I hold on to
When you want to let it slip away
Let it all go

Can't put me out of my misery
The pain brings out the best in me
