

Wolfpack

Blind Channel

Late at night, I'm awake
While the streets are coming alive
Hear the sirens in the air
As the town's running outta line

Stay in the thickness
Frail the weakness
I've been running all my life
Do I make peace with Armadeus
Now we're hunting side by side

Rise up and fight
If you run you only die tired

Standing by my side
So hold your head up high
The storm arrives
The lone wolf dies, but the pack survives

Poisoning our eyes
Our blood as cold as ice
We own the night
The lone wolf dies, but the pack survives
The lone wolf dies, but the pack survives

Somewhere in the city
I can feel you following me
I've been caving in, I couldn't breathe
But with you I'm finally free

If I can't protect you, I'll avenge you
We ain't playin' by no rules
Fear the full moon, feed the young wolf
'Cuz they the ones with the most to lose

Standing by my side
So hold your head up high
The storm arrives
The lone wolf dies, but the pack survives

Poisoning our eyes
Our blood as cold as ice
We own the night
The lone wolf dies, but the pack survives

Lay a finger on my friend
And I'll make your death look like an accident
Lay a finger on my friend
And I will make your death look like an accident

Standing by my side
So hold your head up high
The storm arrives
The lone wolf dies, but the pack survives

Poisoning our eyes
Our blood as cold as ice

We own the night
The lone wolf dies, but the pack-

The storm arrives
We own the night
The lone wolf dies, but the pack survives
