

WOLVES IN CALIFORNIA

Blind Channel

We're the motherfucking outcasts
Taking over the broadcast
Never met a sucker that I couldn't outlast
Now that, you wanna talk about our past
Damn you, now I need someone to shout at
Damn you, now I need someone to shout at
Damn you, now I need someone to shout at

Where I'm from the sun don't rise at all
The only thing I know is

We don't belong here
We don't belong here, no
Everybody tried to warn ya
Now there's wolves in California
Taking over
We're taking over, now
Everybody tried warn ya
Now there's big bad wolves in California

Back home we used to be the fucking black sheep, sweet
Now they calling us a flagship
Straight outta Hell - sinki
Now things are getting outta hand in the backseat

Where I'm from the time is frozen still
We'll bring the howling to the hills

We don't belong here
We don't belong here, no
Everybody tried to warn ya
Now there's wolves in California
Taking over
We're taking over, now
Everybody tried warn ya
Now there's big bad wolves in California

The night is darkest just before the dawn
But where I'm from the sun don't rise at all

Damn you, now I need someone to shout at
Damn you, now I need someone to shout at
Damn you, now I need someone to shout

We don't belong here
We don't belong here, no
Everybody tried to warn ya
Now there's wolves in California
Taking over
We're taking over, now
Everybody tried warn ya
Now there's wolves in California
There's wolves in California
There's big bad wolves in California
