

Bed Springs Blues

Blind Lemon Jefferson

Got something to tell you : make the hair rise on your
head

Got a new way of getting down : make the springs tremble
on your bed

My gal got a new way of trembling down : make a crazy man
leave his home

When she grabs you and turns you loose : makes the flesh
tremble on your bones

Well my gal got something at home : that I sure do like
That's the long folding bed : with the cover all right
back

Don't blame me mama : for talking out my head
I'm worried about the movements you got : and those
springs trembling on your bed
