

Just Know

Blindspott

Caught between you and thin air, you unnotice me
The price of this fear is the unknowing, I just want you to know
w

I won't go on without you, I only know which way to go, because
I found you
Until I am dust, I give my world to you and I'm sorry if I've never
ever said those words to you

Now you lay here, close beside me
In silence, your fears just are inside me, I want you to know

I won't go on without you, I only know which way to go, because
I found you
Until I am dust, I give my world to you and I'm sorry if I've never
ever said those words to you
Just know I've always wanted too, just know I've always wanted
too
I've always wanted too, I've always wanted too
