Echo

Blindwish

Your picture used to mean so much to me
But now it don't mean anything
The roses are black
The violets are dead
You are a dark mind
With no soul left to live

You're just a shadow, shadow, shadow
Just a shadow fading out
You're just an echo, echo, echo
Just an echo to me now

I can hear but I can't see
(You're just an echo, you're just an echo)
What you used to mean to me
(Just an echo, I need to let go)
You're just an echo
I need to let go

Just a shadow, shadow, shadow
Just a shadow fading out
Just an echo, echo, echo
Just an echo to me now

I can hear but I can't see
(Just an echo, just an echo)
All our fucked up chemistry
(You're just an echo, I need to let go)

I can hear but I can't see
(You're just an echo, you're just an echo)
All our fucked up chemistry
(It's just an echo, I need to let go)

You're just an echo
I need to let go
You're just an echo
I need to let go

I can hear but I can't see
(You're just an echo, you're just an echo)
What you used to mean to me
(You're just an echo, I need to let go)

I can hear but I can't see
(You're just an echo, you're just an echo)
All our fucked up chemistry
(It's just an echo, I need to let go)

You're just an echo
I need to let go
