Closedown

Blitz

I never saw you bleed
As I watched you flying past
But when the lights went out
And you broke up in the blast

So the TV is not here now
These shades are then remains
O! The people sitting in the dark
The people with no names

You always love the violence
Since the soldiers they took your brain
So you can talk to them now
Before going down the drain

The white light it has burned us

We're screaming and left blind
This closedown has no style
This closedown was not timed

I never saw you bleed
As I watched you flying past
But when the lights went out
And you broke up in the blast

The white light it has burned us
We're screaming and left blind
This closedown has no style
This closedown was not timed
