

# My True Name

Bloc Party

Into your eye line  
Keep me in your sights  
I asked about you  
And how to get into your life  
Like daylight through a stained-glass window  
Our colours run  
Her voice seems like the Thames in the morning  
It makes me strong

If you're looking for devotion  
Then come to me  
If you're fearing your emotions  
You gotta believe me that it goes both ways

Into your orbit  
I will not be denied  
I asked about you  
And how to keep you on my side  
If we are part of the same constellation  
Shifting in the night  
She whispers to me "don't waste the daylight"  
It brings me round

If you're looking for devotion  
Then come to me  
If you're fearing your emotions  
You gotta believe me that it goes both ways

Lean on me, lean on me  
I'll take full strain  
I'll soften the blow  
I'll tease away  
And I'll take on anyone  
That tries to mess with us  
Your love  
Should be good enough

From this day forward  
You will call me by my real name  
You must call me by my true name  
Today  
From this day forward  
You will call me by my real name  
You must call me by my true name  
Today  
From this day forward  
You will call me by my real name  
You must call me by my true name  
Today  
From this day forward  
You will call me by my real name  
You must call me by my true name
