

Can we get real for a moment?  
You're my one and only friend

Watch the sunset from your sedan  
Let your hand rest on mine

I've lived in every town  
But here is where I find home

My mind is open  
And my body is yours  
Show me the sign  
Please

I was so sure, I was faulty  
And not able to love  
But then you crept up on me  
While I was dreaming  
Whispered love into my ear

I've lived in every town  
But here is where I find home

My mind is open  
And my body is yours  
Show me the sign

If you're tired  
I can drive us  
We can go back  
To my place

My mind is open  
And my body is yours  
Show me the sign  
Please
