

## Open Window

## Blood Youth

Can you feel this picture  
Can you taste the air  
Can you feel this picture  
Can you taste the air  
Can you feel this distance  
See the scars we share  
With each other  
With each other

I watched the colours fade  
Into the distance  
I used to listen  
I watched the faces change  
I felt the colours fade  
Into the distance  
I used to miss them  
I watched the faces change

I watched the faces change  
I watched the faces change

Just need to feel alone again  
Fall into something real  
Something real to me  
Smiling wide for all to see  
I'm standing on the edge  
Will you die for me?

I watched the colours fade  
Into the distance  
I used to listen  
I watched the faces change  
I felt the colours fade  
Into the distance  
I used to miss them  
I watched the faces change

I watched the faces change

I felt the colours fade  
Into the distance  
I used to miss them  
I watched the faces change

I watched the faces change  
I watched the faces change
