

## Deader

## Bloodbath

I'm infested with the ligaments of devilry  
Mephistophelean...  
In conspiracy with each and all the elements  
Jaws of the abyss devour my mind  
From root to branch, my spine entrenched  
Luciferian...  
White is the noise that reverse my voice  
Winds of plague desaturate my sight

An apparition from the underworld  
His infernal majesty bestowed  
Harnessed collision of the earth and sky  
Turn loose the undead horde

Like an ever tumbling maelstrom  
From the void in the night - sky periphery  
Written in the oath of the apocalypse  
Transmitting trails of emptiness

Dawn of the dead  
Dawn of the dead  
Dead  
Day of the deader  
Dead  
Dawn of the dead  
Dead  
Dead  
Dead  
Day of the deader

Crumbling pillars of a divine creation  
Shattered in debris of ashes feathery  
With skills acquired from beyond this plane  
Black holes used as occult armory  
Gyroscopic is the shadow within the devil's rotary  
The crooked axis of mankind yields  
Earth dethroned by the usurper of climate. time and gravity

I'm possessed  
In the delta of my poisoned veins  
Demonifuge, my immunity strains  
I'm obsessed  
Sinfully I lust for my death  
Insanity has leeches my last breath
