The case is closed, the picture framed But it wasn't you No one seems to listen And no one ever cares Your pleas for innocence Do nothing for you now Nothing ever happens It's like nothing ever will Into the play This farce if you will A man with a cure Plague doctor You owe me I saved you You don't know me, but I you If you fail me And I see you There's no telling What I'd do Watch him closely, do just what I do The tenants in this venture They'll walk all over you He's a man of stature Got credentials like a God So tap into the system Have a look! He's nowhere to be found Like the plague This man of the world He's all that you've heard Plague doctor You owe me I saved you You don't know me, but I you If you fail me And I see you There's no telling What I'd do
