

Cut Me and I'll Bleed

Blossoms

Cut me and I'll bleed
Red will flow, I watched her go
Cut me and you'll see
I'm not lost, the winter frost from the night
It comforts me

Cut me and I'll bleed
Jealousy, she envies me
Cut me and you'll see
I can adore this tricky love in the night
She comforts me

So come and show me what you want
Would you tell me if you wanted my love?
Come and show me what you need
Cut me and I'll bleed...

Show me what this could be
Your mystic lips tell me this
Throw me another lead
Because I can tell I'm under the spell in your eyes
They comfort me

So come and show me what you want
Would you tell me if I wanted your love?
Come and show me what you need
Cut me and I'll bleed...

And I replay this is my mind
To remind me I'm not lonely
But I don't know where you are
And I'm not sure If I'm your only one

So come and show me what you want
Would you tell me if I wanted your love
Come and show me what you need
Cut me and I'll bleed...
