

Bluer Than Blue

Blu

I like blue
Can we sing about the color blue? (Sure)
B-L-U (Blu)
B-L-U spells Blu
B-L-U (B-L-U)
B-L-U spells Blu
B-L-U (Blu)
B-L-U spells Blu
B-L-U (B-L-U)
B-L-U spells Blu
Now it's your turn, let's try it with the music
Bluer than blue

Sometimes I be feeling like Superman
Other times, I'm looking 'round like who's the man?
Cause ain't no way I can take credit for this blessing
This bliss, this heaven abyss
Yo, we was heading to the trap 'til the stu' called back
I put the long naps under my ball cap
And rapped them long raps, skipping them long naps
On long ass trips to admire more sky than the usual
Thank God I don't know why, but I fly more than the usual
Must be getting wiser, the skies make the time fly flier
Tell the driver, "Drive safer than usual"
Skipping on hotboxing the whip like we usually do
Skipping on dipping with the dip so suitable
Looking at the world like my musical
Playing keynotes, playing key quotes, I know used to flow
Tryna tell my folks that flowing ain't easy
Fly by night, painting the sky on the freeway
I need a pen, I need a pad, I need a place to go
To write down what I know, yo
You know me like you know your OG, same flow
Same steez when they made me (Bluer than blue)
Tell Nat Turner we blast burners too
Harriet Tubman is free so journey to what we gotta do
Tell me 'bout any mountain I should move
Any doubt I gotta prove that I'm (Bluer than blue)
I can prove it, that mission impossible, I can do it
And you know that I can't, but you still see me through
And you respect me cause you expect me to be me
To the fullest degree like everyone that you meet
It must be cool being a G-O-D
God-body, God got me, ain't no need to repeat
I keep this beat on repeat like every other beat that I keep
And plan to bar up too, got far too much heat
I wanna rap about everything that I think
But every time that I blink, a new revolution is asking me to link
Be a part of this three part series, part love

Part theories and part of whatever I am a part of
For instance, family, friends, my religion
Relationships, business and places I got to visit
Who is it? The visionary seeing you through and through
While you do what you do, I'll be (Bluer than blue)
It's a long journey but I'm here for the ride
I take it all in with stride and tell the story with pride

Eyes wide open, soaking ever moment that I can
And stay woke and stay open and (Bluer than blue)
Cause I know when it rains, it pours
And it's a storm coming down on the ground, good Lord
And no one is safe from the things they do
So remain true, even when you're (Bluer than blue)
You ever fell down so down, you fell onto the ground
And everyone around you didn't hear a sound?
They just drowned you in doubt that you never get up
Then you see the blue sky and remember who you was
A superhero, keeping people from being stupid zeroes
Even if it took a little ego, we made a deep flow
The water looked bluer than blue
She said, "I never met a rapper that was truer than you"
Fewer than few that go out and do what I do
Day after day, make a way with no way to see the troops
Somedays I say, "This can't be me"
Angrily painting beats with hate and basically defeat
But then I get up, switch my pitch up
Slap the bitch up outta me like I gotta be much bigger
Bolder, look out world, we taking over
Taking pictures with the globe on my shoulders
The breeze blowing over, beware of the cool
I once met a fool who was bluer than blue
I said, "This couldn't be true", I looked in the mirror and it was you
It was cold blooded how they did dude
The capital B-L-U
Selling fools the blues, telling fools the truth
Like hell is cool but dude, Heaven is much cooler
If you was the blue sky, I'd be bluer (Bluer than blue)
The ocean will be deeper too
'Til something in the water makes the people blue
High as eagles who flew to high to survive
I realized only black is (Bluer than blue)
