

## Hard to Remember

Blue Rodeo

We were in a borrowed car  
Windows down, summer stars  
And in that dash board glow  
You said I look like a ghost  
And it was time for me to go

You had to work, we got a late start  
You made a list of all the things I forgot  
You said I was a man living with a curse  
Spent my whole life chasing moon dust

I don't like the way that you talk to me  
How you're always putting me down  
Nothing I ever do is good enough for you  
Will I ever realize you're never satisfied

'Cuz now that you're gone  
I find it so hard, hard to remember  
Th at we were happy together  
We were happy, we were happy together
