

## Tell Me Again

Blue Rodeo

Tell me again about that love that lasts forever  
How we'll ride the ups and downs all through the years  
And I won't think about my pain  
As I listen to you explain  
How that perfect love just up and disappears

Oh later on when you're gone  
And I can think again  
I'll sit down and I'll figure out what went wrong  
Well I expect to take my licks  
But life plays dirty tricks  
I knew that I was sinking but I held on way too long

Tell me again about that love that lasts forever  
It's all happiness and smiles and never tears  
And I won't think about my pain  
As I listen to you explain  
How that perfect love just up and disappears

Chestnut eyes and golden hair  
That's what brought me here  
I looked at you and froze right in my place  
There's a line you never cross  
Between what's won and lost  
I knew I stepped right over when I stared into your face

Tell me again about that love that lasts forever  
How we'll ride the ups and downs all through the years  
And I won't think about my pain  
As I listen to you explain  
How that perfect love just up and disappears  
How that perfect love just up and disappears
