

# Gravity

Blue

Watching her sleep  
Laying beside me  
Dreaming must holding my hand  
Squeezing her tight  
I feel her heartbeat  
I never want this to end

So why don't you follow me  
Intertwined naturally, oh  
And keep the faith, yes, I'll be true  
We'll make the sun go round the moon, oh

We're surrounded by illusions  
The things we cannot see  
There's something pushing you  
There's something pulling me  
It's got us in its grasp  
We're drawn to it like gravity  
Gravity, yeah

[?] so easy to want her  
Pure as the heart and soul  
Wherever you are, I wanna be there  
You make me reach for the stars

So be careful what you wish for  
Oh be careful how it's done  
Your heart, it speaks the truth  
And you're the only one  
It's got us in its grasp  
We're drawn to it like gravity  
Gravity, yeah

We're surrounded by illusions  
The things we cannot see  
There's something pushing you  
This force is pulling me  
I'm drawn to it like gravity  
Drawn to it like gravity

So be careful what you wish for  
Oh be careful how it's done  
Your heart, it speaks the truth  
And you're the only one  
It's got us in its grasp  
We're drawn to it like gravity  
Yeah, gravity
