

# Look What You Started

Blue

I've been wrong, and I've been right  
Sometimes the things you know  
Fall down like dominoes  
Ain't got no grand design for life  
Somehow you never left my side

You brought my whole world back to life  
And now I'm living in paradise  
Look what you started  
I'm giving you all my love, all my love  
I wanna watch our worlds collide  
Keeping us together till the end of time  
Look what you started  
I'm giving you all my love, all my love tonight  
I'm giving you all my love, all my love tonight

You've seen my highs, you've seen my lows  
No judgement in your eyes  
You never criticise  
You know my heart, you know my soul  
Now every part of you  
Feels like home, whoa

You brought my whole world back to life  
And now I'm living in paradise  
Look what you started  
I'm giving you all my love, all my love  
I wanna watch our worlds collide  
Keeping us together till the end of time  
Look what you started  
I'm giving you all my love, all my love tonight  
Whoa  
All my love, all my love tonight  
Whoa  
All my love, all my love tonight

And we're still right here  
After all these years  
Look what you started  
Look what you started  
I watch the world light up  
I'll give you all of my love  
Look what you started  
Look what you started

You brought my whole world back to life  
And now I'm living in paradise  
Look what you started  
I'm giving you all my love, all my love  
I wanna watch our worlds collide  
Keeping us together till the end of time  
Look what you started  
I'm giving you all my love, all my love tonight  
Whoa  
All my love, all my love tonight  
Whoa  
All my love, all my love tonight

Whoa

All my love, all my love tonight

I'm giving you all my love, all my love tonight
