

Man Do

Blue

I would walk through fire
Six needles in my eyes
Kill a random guy
And then wreck me out
Poison in my drink
Cuff me to your sink
I'll do all these things

You know how to set me on
I'll be here through hate and love
Put the pleasure in the pain
Wrap you round me like a chain

Tell me how it makes you feel
To have a man on his knees

Safer baby, please

What you make a man do
What you make a man do
What you put a man through
What you put a man through
You have no shame, she's my main
Imma slave for you
What you make a man do
Man do

What you make a man do
Man do

I might scream and cry
I might even die
But it's what I like
I'd take it in your strike

Tell me how it makes you feel
To have a man on his knees

Safer baby, please

What you make a man do
What you make a man do
What you put a man through
What you put a man through
You have no shame, she's my main
Imma slave for you
What you make a man do
Man do

All night, all night
Putting in the work all night
Hold tight, hold tight
Imma make you last all night

All night, all night
Putting in the work all night
Hold tight, hold tight

Imma make you last all night

What you make a man do

What you make a man do

What you put a man through

What you put a man through

You have no shame, she's my main

Imma slave for you

What you make a man do

Man do

Whoo-hoo

What you make a man do

Make a man do (whoo-hoo)

Imma make you last all night

What you make a man do
