

Stop

Blue

All of you
You're the future me
And together we
Can do some healing

We'll never know (we'll never know what we could be if we could see)
(Through each other's eyes and look inside)
We could come together
We could come together

If we just stop and be children again
Just stop and be hopeful again
Just stop and be human again
Just stop and love again
Stop and be children again
Just stop and be hopeful again
Just stop and be human again
Just stop
Stop, stop

How far do you expect to go
If we don't ever change?
How on earth do we expect to grow
If things remain the same?

We'll never know (we'll never know what we could be if we could see)
(Through each other's eyes and look inside)
We could come together
We could come together

If we just stop and be children again
Just stop and be hopeful again
Just stop and be human again
Just stop and love again
Stop and be children again
Just stop and be hopeful again
Just stop and be human again
Just stop
Stop, stop

Hold my hand, let's make a plan
Let's take a stand, yeah, yeah
I'll recommit if you admit
That you can see the condescending queen with me
That is not okay

Not another second
Not another minute
Not another day we can go about it this way
We got to change (change)
We got to change (change)
We got to change
