

Don't Want Me No More

Blues Saraceno

Early to bed 'cause I've been defeated
One more try that has been deleted

I can't make you if you won't
We won't make it if you don't
All our friends they just don't know
I'm in love and you don't want me no more

One more fight that has been repeated
One last time, did you really mean it

I can't make it on my own
We can't take it if you don't
All our friends they just don't know
I'm in love and
You don't want me no more

I can't make you feel this way, alright
You just take yourself away and hide
You don't want to try at all
It's not my fault, you're already gone

One more time that I've been defeated
One more try that has been deleted
One more time, did you really care
One more time, did you really care

I can't make it on my own
I can't take it if you won't
We won't make it if you don't
All our friends they still don't know
I'm in love and you want to
I'm in love and you don't care
I'm in love and... you don't want me no more
