

Here I come, I'm ready to destroy  
I'm not alone, I'm just one with the cold  
This world's unreal, it's full of fantasies  
I learned to grin before I bleed

I'm the collision, the one who rules the game  
Faster than the light, I'm faster than the flame  
You want to live and free your mind?  
Just follow me to the dark side

Follow, follow, follow me to the dark side  
And never look back, follow me to the dark side  
Follow, follow, follow me to the dark side  
And never look back, follow me to the dark side

Follow me where you belong  
The blood moon inside the soul  
Angels fall, angels fall. They fall into the void  
Don't be afraid to say goodbye  
Fragile hearts deserve to die  
Angels fall, angels fall. They fall into the void

Here I am, I'm ready for the assault  
The time stops, everybody's on the run  
All memories touch my body like the wind  
'Cause pure disruption is all I feel

I am the master, corrupter of the love  
I'll show you who's the one in control!  
You want to live and free your mind?  
Just follow me to the dark side

Faster, faster, nothing will be lost  
I go faster, I don't need to stop  
I'm made of flesh and the visions of my mind  
Just follow me to the dark side

Follow me where you belong  
The blood moon inside the soul  
Angels fall, angels fall. They fall into the void  
Don't be afraid to say goodbye  
Fragile hearts deserve to die  
Angels fall, angels fall. They fall into the void  
...
