

Our Empire

BlutEngel

We come out of the dark
And we hunt for your soul
You can never escape our vampire flair

We will find you in the night
And we show you our world
We bring you immortality

You say you don't believe in a transcental power
You only believe in things that you can see with your own eyes

Believe me, my mortal friend
There's so much more to see

An empire full of pleasures
It's the place for you to be

Don't you want to live forever and don't you want to fly
Like an innocent angel
You will fly up to the sky

You won't grow older and your beauty never fades
Empires will rise and fall
But our race is meant to stay
